

RSA Authenticator for the Atlassian Suite

RSA SecurID is a world-leading two-factor authentication that provides two factor protection to thousands of organization and millions of its users. Go2Group's RSA Authenticator integrates the the Atlassian suite of tools with RSA's SecurID providing two factor authentication with SecurID and Atlassian's credentials.

How can we obtain a evaluation or a demo of the solution?

Please feel free to contact us or raise an Issue at our [Service Desk](#). A user account is needed to raise an Issue and the sign up page can be found here (<https://jira.go2group.com/secure/Signup!default.jspa>).
