

CAC-PIV Atlassian Authentication Suite 3.18.1 Release Notes

Goldfinger Holdings is pleased to announce the release of Client Certificate Authentication 3.18.1.

Description

Name Change

The name organization that owns the solution has been changed from Go2Group to Goldfinger Holdings.

Last login activity

There is a bug in the Jira app where the last login count is not logged in the database correctly. Version 3.18.1 fixes the issue.

Upgrade Guide

In general, if you are coming from a previous version of the solution, users will have to revert the installation procedures to remove the current setup. After that:
